

OptiMind Brand Style Guide

OptiMind Educational Strategies

Status · Reference Source · Provided by Sarah Ritter Original file · [Download .docx](#)

1. Brand Overview

Mission: We help neurodivergent individuals and others who feel stuck, overwhelmed, or scattered build the skills and systems they need to become confident, capable, and thriving in their daily lives.

2. Visual Identity

Logo

Primary logo: use the full-color version on white/light backgrounds.

Monochrome versions can be used for watermarking or minimal layouts.

Color Palette

COLOR	HEX	RGB	USE
 OptiMind Orange	#FF5E16	255, 94, 22	Primary accent, buttons, text headers
 Slate Blue	#A3B5C4	163, 181, 139	Accents
 Soft Blue	#F4FAFD	244, 250, 253	Backgrounds / text boxes
 Charcoal Gray	#383838	46, 46, 46	Body text, outlines

Note: these colors reflect both the logo and live website usage. Orange is used for CTAs and headings; background tones stay soft and minimal.

Typography

- Website fonts appear to be a clean, modern sans-serif typeface (similar to Lato or Open Sans).
- Use Montserrat or Open Sans for brand consistency across docs.
- Font weights vary for hierarchy: bold for headers, regular for body.

- Example sizes: Title 24–30pt · Header 16–18pt · Body 12pt.

Imagery Style

Imagery includes minimal illustrations, iconography, and circular diagrams. The style is clean, neutral, and calming — ideal for neurodivergent accessibility.

Recommended: use similar muted backgrounds and rounded icons in all visuals.

3. Voice & Tone

Tone is warm, professional, and strengths-based. Language focuses on empowerment and clarity.

Examples from website:

- "We help neurodivergent individuals build the skills and systems they need..."
- "We meet you where you are — and move forward together."
Avoid overly clinical language.

4. Templates & Formatting

- Title font: Montserrat Bold, 24–30pt
- Body font: Open Sans or Lato, 12pt
- Line spacing: 1.15 or 1.5
- Use brand orange for headings/callouts
- Place logo in header or footer, aligned to the left

5. Optional Add-ons

- Add branded headers to Google Docs templates
- Create a Google Slides cover with a charcoal gray background and accent photo on the left side of the slide
- Email signature with orange and gray accent
- Favicon and social media icons to match website branding
